ABOUT ME

Computer Science undergraduate passionate about building intuitive web experiences and solving complex problems. Experienced in developing responsive websites using HTML and CSS, along with strong UI/UX design skills in Figma backed by multiple projects. Proficient in Java and Data Structures & Algorithms, with a proactive approach to learning and applying new technologies.

PROJECTS

Portfolio Website

React.js · JavaScript · CSS · React Router · Framer Motion

- Designed and developed a modern, fully responsive developer portfolio with smooth animations and interactive UI.
- Showcased projects, skills, and experience using reusable React components and clean frontend architecture.

SkillSync — Personalized Developer Learning Platform

React.js · JavaScript · Firebase · React Router · HTML · CSS

- Developed a responsive learning platform featuring personalized skill roadmaps, goal tracking, and GitHub profile integration.
- Implemented Firebase Authentication, reusable React components, and REST API integration to deliver a scalable user experience.

Interactive Magazine Web UI

Figma · Auto Layout · Components · Variants · Prototyping

- Designed a high-fidelity magazine interface with reusable components and a consistent design system.
- Created responsive layouts and interactive prototypes using Auto Layout and Variants.

Expense Tracker Web App

HTML · CSS · JavaScript · Local Storage

- Built a responsive expense tracking application with CRUD functionality and persistent local storage.
- Implemented real-time balance calculations and an intuitive user interface.

OrbitX — Space Exploration Website

HTML · CSS · JavaScript · Responsive Design

- Developed a responsive multi-section website featuring modern layouts, animations, and interactive UI elements.
- Focused on immersive user experience with clean design and optimized responsiveness across devices.
